BE PREPARED NOT SCARED
Emergency Preparedness Starts With You
SAFE GUARD
BE PREPARED NOT SCARED
Emergency Preparedness Starts With You
SAFE GUARD
IN YOUR DAY-TO-DAY LIVING, DISASTERS MAY SEEM A DISTANT POSSIBILITY. YET NATURAL DISASTERS, SUCH AS FLOODS OR TORNADOES; TECHNOLOGICAL OR ENVIRONMENTAL ACCIDENTS, SUCH AS CHEMICAL SPILLS; OR SERVICE DISRUPTIONS, SUCH AS POWER FAILURES DURING THE WINTER, CAN STRIKE ANY COMMUNITY, INCLUDING YOURS, AT ANY TIME.

If you're unprepared for a disaster, it can shatter your life.

Expect the unexpected and plan for it...
Knowing what to do when a disaster strikes will help you better control the situation and be in a better position to recover more quickly.

No community is equipped to handle all the demands of a catastrophe. Help your community by preparing yourself.

Make sure everyone in your family knows what to do before, during and after an emergency.

Set up a family meeting this week to discuss how you can best prepare for an emergency. Have your own plan.
WILL your whole family think clearly and logically in a crisis?

NOT MANY OF US CAN. SO DO YOUR CLEAR, LOGICAL THINKING NOW – WHEN YOU HAVE THE TIME TO BE THOROUGH.

PREPARE NOW
Your best protection in any emergency is knowing what to do. Read this brochure, and act on its suggestions.

KNOW YOUR ENEMY
Find out what natural and technological disasters could happen in your community. Know what to expect during each disaster.

LOOK AT YOUR OWN SITUATION
Hazard-proof your home
Anticipate what could go wrong in your home and take corrective action.

If you live in an earthquake zone, move or secure objects that could fall and injure you: books, plants, mirrors, lamps, china. Secure objects that could tip and start a fire: water heater, gas appliances.

If you live in a tornado zone, secure anything that might be blown around or torn loose, both indoors and outdoors.
If you live in a flood-prone area, remove all chemical products from the basement. Move irreplaceable belongings to upper floors.

You can install a non-electric standby heating unit that is not dependent on a motor, fan, or any other electrical device to function. Vent the stove or heater adequately with the type of chimney flue specified for it. Never connect two heating units to the same chimney flue at the same time.

**Post emergency numbers**

Keep a list of key telephone numbers and addresses near the phone. (If there's been a major disaster, use the phone only if it's absolutely necessary. Emergency crews will need all available lines.)

**Check your insurance**

Make sure you have adequate insurance coverage for the range of risks in your community.

**PREPARE AN EMERGENCY SURVIVAL KIT**

Aim to have an emergency survival kit that will keep you and your family self-sufficient in your home for at least three days.

If you've got a flashlight, battery-operated or a crank radio, food, water and blankets, you already have part of an emergency survival kit. All you have to do is assemble the supplies in an easy-to-carry container (in case you have to evacuate).

**Keep a smaller survival kit in your car**

A blanket, extra clothing, a candle in a deep can and matches can save your life.

**OTHER PROCEDURES**

Here are some other steps that can make your life more tolerable in the event of a disaster.

**Choose an out-of-area or province family contact**

Choose someone in another province to be your family's contact. After the disaster, it is often easier to call out of the region as the local phone lines might be tied up. Make sure everyone memorizes this person's name and telephone number and knows to call your family contact if they get separated from the family.
Have a show and tell
If you live in a house
Teach members of your family where and how to shut off the water, electricity and gas supply. Make big easy-to-see signs saying Breaker Panel (or main circuit breaker), Gas and Main water supply. Put these signs near the breaker panel, gas valve and main water valve.

If you live in an apartment
Show everyone in your family where the emergency exit is. Show them where the fire alarm is, and explain when and how to use it. In a fire or other emergency, don't use the elevators. You'll be trapped in the elevator if the power goes out.

Learn about other community emergency plans
Your kids' school and your work place might have their own emergency plans. Find out what they are and how they apply to you. You may be separated from your family and need to know how to get reunited. You can assist in educating your children about school plans, etc.

Avoid potential emergency situations
Heed weather warnings and avoid driving and other activities in hazardous weather conditions.
KNOW what to do
DURING a DISASTER

HERE are some basic procedures for specific disasters. (For more information on these and other disasters, contact the Office of Critical Infrastructure Protection and Emergency Preparedness, your provincial or territorial emergency measures organization or your local Red Cross Office.)

DURING AN EARTHQUAKE
If you are in a building
Stay inside. Stay away from windows. Get under a heavy desk or table and hang on. If you can't get under something strong, flatten yourself against an interior wall, protect your head and neck.

If you are outside
Go to an open area. Move away from buildings or any structure that could collapse. Stay away from power lines and downed electrical wires.

If you are in a car
Stop the car and stay in it. Avoid bridges, overpasses or underpasses, buildings or anything that could collapse on you and your car.

DURING A TORNADO
If you are in a building
Go to the basement immediately. If there isn't one, crouch or lie flat (under heavy furniture) in an inner hallway or small inner room or stairwell away from windows.

Stay away from large halls, arenas, shopping malls, and so on (their roofs could collapse).
If you are caught outside
If there is no shelter, lie
down in a ditch or ravine,
protecting your head.

If you are driving
Get out of and away from
the car. It could be blown
through the air, or roll over
on you. Lie down as above.

DURING A SEVERE
LIGHTNING STORM
If you are in a building
Stay inside. Stay away from windows, doors,
fireplaces, radiators, stoves, metal pipes,
sinks or other electrical charge conductors.
Unplug TVs, radios, toasters and other
electrical appliances. Don't use the phone or
other electrical equipment.

If you are outside
Seek shelter in a building, cave or
depressed area. If you’re caught in the
open, crouch down with your feet
close together and your head down
(the “leap-frog” position). Don't lie
flat - by minimizing your contact
with the ground you reduce the risk
of being electrocuted by a ground
charge. Keep away from telephone
and power lines, fences, trees and hilltops.
Get off bicycles, motorcycles, and tractors.

If you are in a car
Stop the car and stay in it. Don't stop near
trees or power lines that could fall.

DURING A FLOOD
Turn off basement furnaces and the outside gas
valve. Shut off the electricity. If the area around
the fuse box or circuit breaker is wet, stand on
a dry board and shut off the power with a dry
wooden stick.

Never try to cross a flood area on foot. The fast
water could sweep you away.

If you are in a car
Try not to drive through flood waters. Fast
water could sweep your car away. However,
if you are caught in fast rising waters and
your car stalls, leave it and save yourself and
your passengers.
DURING A WINTER POWER FAILURE
Turn the thermostat(s) down to minimum and turn off all appliances, electronic equipment and tools to prevent injury, damage to equipment and fire. Power can also be restored more easily when the system is not overloaded.

Use proper candleholders. Never leave lit candles unattended.

Don't use charcoal or gas barbecues, camping heating equipment, or home generators indoors.

Home generators are handy for backup electricity in case of an outage, but there are hazards to be aware of.

To operate a generator safely, follow the manufacturer’s instructions, and always:

• Ensure that the generator operates outdoors in well-ventilated conditions, well away from doors or windows.

• Connect lights and appliances directly to the generator. If extension cords must be used, ensure they are properly rated, CSA (Canadian Standard Association) approved cords.

Direct installation of a generator to an existing electrical system should only be done by a qualified technician.
RIGHT AFTER THE EMERGENCY, YOU MAY BE CONFUSED OR DISORIENTED. STAY CALM AND REMEMBER THE FOLLOWING PROCEDURES.

HELP THE INJURED
Help anyone who is injured. Get your emergency survival kit (the first-aid kit should be with it).

LISTEN TO THE RADIO
Listen to your local radio station on your battery-operated radio for instructions.

DON'T USE THE TELEPHONE
Don't use the telephone unless it is absolutely necessary. Emergency crews will need all available lines.
CHECK YOUR HOME
Check for damage to your home. Remember the following points:

• Use a flashlight – don’t light matches or turn on the electrical switches if you suspect damage or smell gas.
• Check for fires, fire hazards or other household hazards.
• Sniff for gas leaks, starting at the water heater. If you smell gas, turn off the main gas valve, open windows and get everyone outside quickly.
• Shut off any other damaged utilities.
• Clean up spilled medicines, bleaches, gasoline and other flammable liquids immediately. Wear protective clothing. For major spills or leaks, call in professional help.
• Confine or secure your pets.
• Check on your neighbours, especially the elderly or people with disabilities.

IF YOU TURN OFF THE GAS, IT SHOULD ONLY BE TURNED BACK ON BY A PROFESSIONAL FROM THE GAS COMPANY.
# POST EARTHQUAKE HAZARD

<table>
<thead>
<tr>
<th>WHAT TO DO</th>
<th>POST-FLOOD HAZARDS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stay out of damaged buildings, even if they look okay</td>
<td>Contaminated drinking water</td>
</tr>
<tr>
<td>Stay put</td>
<td>Contaminated dishes and utensils</td>
</tr>
<tr>
<td>Use emergency water from water heater, toilet tank, melted ice cubes.</td>
<td>Basement full of water</td>
</tr>
<tr>
<td>If you live in an apartment, don’t use the elevator. You’ll get stuck in it.</td>
<td><strong>WHAT TO DO</strong></td>
</tr>
<tr>
<td>If you live near the ocean, stay away from the waterfront.</td>
<td>Use bottled water or bring water to a rolling boil for ten minutes, or add one drop of non-perfumed chlorine bleach per litre of water, or three drops per litre of cloudy water, and allow it to stand for 30 minutes before consuming. (Water should still have a slight chlorine smell.)</td>
</tr>
<tr>
<td>Drain the water in stages, about a third of the volume of water per day. (Draining the water too quickly can structurally damage your home.)</td>
<td>Wash and sterilize dishes and utensils. Use boiling water or use a sterilizing solution of one part chlorine bleach to four parts water; then rinse dishes and utensils thoroughly.</td>
</tr>
</tbody>
</table>

<tr>
<td>Loose or dangling electrical wires</td>
<td>Stay away. Advise the authorities if you can.</td>
</tr>
<tr>
<td>Broken sewer and water mains</td>
<td>Advise the authorities if you can.</td>
</tr>
</tbody>
</table>

Watch for mould

Mould is a health hazard. If mould is present wear a face mask and disposable gloves. Anything that stays wet long enough will grow mould. Dry everything quickly to avoid future health problems.
IF THE EMERGENCY IS SERIOUS ENOUGH, YOU MAY BE ASKED TO LEAVE YOUR HOME AND GO TO A NEARBY EVACUATION CENTRE, LIKE A SCHOOL GYM OR A COMMUNITY HALL.

IF YOU HAVE TO EVACUATE
• Leave immediately.
• Take your emergency survival kit with you.
• Listen to the radio and follow instructions from local emergency officials.
• If you are instructed to do so, shut off water, gas and electricity.
• Make arrangements for pets.
• Wear clothes and shoes appropriate to conditions.
• Lock the house.
• Follow the routes specified by the officials. Don’t take shortcuts. A shortcut could take you to a blocked or dangerous area.
• If you have time, leave a note telling others when you left and where you went. If you have a mailbox you could leave the note there.

If you are evacuated, sign up with the registration centre so you can be contacted or reunited with your family and loved ones.

If you have to evacuate your home for a prolonged period during a winter power failure, drain the water from the plumbing system. Starting at the top of the house, open all taps and flush toilets several times, and open the drain valve in the basement. Drain your hot water tank by attaching a hose to the tank drain valve and running it to the basement floor drain. (If you drain a gas-fired water tank, the pilot light should be turned off – the local gas supplier should be called to re-light it!) Unhook washing machine hoses and drain.
You won’t “act like yourself” for a while. Most people caught in a disaster usually feel confused. They may tremble, feel numb, vomit or faint. Immediately after the disaster they often feel bewildered, shocked, and relieved to be alive. These feelings and reactions are perfectly normal.

Later many survivors sleep poorly, have no appetite, are angry with those around them, or panic at the slightest hint of a storm. Children might start thumb sucking or bed wetting. These feelings and reactions are perfectly normal too.

How to get back on track
Here are some suggestions to help get yourself and your family back on track after the disaster.

Talk about your feelings. Talk about what’s happened.

Encourage your children to express their feelings. They may want to do this by drawing or playing instead of talking. Understand that their feelings are real. Recognize that when you suffer a loss, you may grieve. (Yes, you can grieve the loss of a wedding photo or your grandfather’s favourite ring.) You may feel apathetic or angry. You may not sleep or eat well. These are normal grief reactions. Do give yourself and your family permission to grieve and time to heal.
How to help your children

Children exposed to a disaster can experience a variety of intense emotional reactions such as anxiety, fear, nervousness, stomachaches, loss of appetite and other reactions. These are normal and temporary reactions to danger. Parents can help relieve such reactions by taking their children's fears seriously, by reassuring them, giving them additional attention and hugging them.

A CHILD WHO FEELS AFRAID IS REALLY AFRAID.

After a disaster, children are most afraid that
• the event will happen again
• someone will get hurt or injured
• they will be separated from the family
• they will be left alone.

So comfort and reassure them. Tell them what you know about the situation. Be honest but gentle.

Encourage them to talk about the disaster. Encourage them to ask questions about the disaster.

Give them a real task to do, something that gets the family back on its feet.

Keep them with you, even if it seems easier to look for housing or help on your own. At a time like this it's important for the whole family to stay together.
THINK of any special needs that someone in your family might have. Include any other items that your family would need. Here are some suggestions.

Babies/toddlers
- diapers, bottled milk, toys, crayons and paper

Other family members
- prescription medication, extra eye glasses (keep at least one week supply of medication in your emergency kit and include copies of prescriptions for your medicine and glasses.)

Pets
- dog/cat food

LARGE ORANGE GARBAGE BAGS MAKE GREAT RAIN PONCHOS.

CHECKLIST
EMERGENCY FOOD AND WATER KIT

Have at least a three-day supply of food and water on hand. Choose ready-to-eat foods that your family likes. And choose food that doesn't need refrigeration.

DRINKING WATER
- At least two litres per person per day

FOOD
- Canned food: soups, stews, baked beans, pasta, meat, poultry, fish, vegetables, fruits
- Crackers and biscuits
- Honey, peanut butter, syrup, jam, salt and pepper, sugar, instant coffee, tea

EQUIPMENT
- Knives, forks, spoons
- Disposable cups and plates
- Manual can opener, bottle opener
- Fuel stove and fuel (follow manufacturer's instructions.) Don't use a barbecue indoors.
- Waterproof matches and plastic garbage bags

REPLACE CANNED FOOD AND DRY GOODS ONCE A YEAR.
Flashlight and batteries (in case the lights go out)
Radio and batteries or crank radio (so you can listen to news bulletins)
Spare batteries (for radio and flashlight)
First-aid kit
Candles and matches/lighter
Extra car keys and cash (including coins/cards for telephone)
Important papers (identification for everyone, personal documents)
Food and bottled water (See “Food list”)
Clothing and footwear (one change of clothes per person)
Blankets or sleeping bags (one blanket or sleeping bag per person)
Toilet paper and other personal supplies
Medication
Backpack/duffel bag (or something else to carry the emergency survival kit in, in case you have to evacuate)
Whistle (in case you need to attract someone’s attention)
Playing cards, games
CHECKLIST
CAR KIT

- Shovel
- Sand, salt or kitty litter
- Traction mats
- Tow chain
- Compass
- Cloth or roll of paper towels
- Warning light or road flares
- Extra clothing and footwear
- Emergency food pack
- Axe or hatchet
- Booster cables
- Ice scraper and brush
- Road maps
- Matches and a ‘survival’ candle in a deep can (to warm hands, heat a drink or use as an emergency light)
- Fire extinguisher
- Methyl hydrate (for fuel line and windshield de-icing)
- Flashlight
- First-aid kit with seatbelt cutter
- Blanket (special ‘survival’ blankets are best)

KEEP YOUR CAR GASTANK AT LEAST HALF-FULL AT ALL TIMES.

SAFE GUARD is a national information program based on partnerships and aimed at increasing public awareness of emergency preparedness in Canada.

The triangle depicted in the program logo is the international symbol of emergency preparedness. The jagged line evokes the maple leaf, Canada’s internationally recognized symbol. The amber yellow colour represents caution and warning.

SAFE GUARD Emergency Preparedness Partners in Canada

The SAFE GUARD program brings together government, private organizations and voluntary agencies that are part of the emergency preparedness, response, recovery and mitigation community.

SAFE GUARD is an Office of Critical Infrastructure Protection and Emergency Preparedness program.
